BLADDER DRAINAGE & STRICTURE THERAPY

Navigating even
the most difficult tract.

Flexicare has a wide range of intermittent catheters for bladder drainage and stricture therapy. We provide a range of Standard, Female and Paediatric lengths meeting all patients requirements.

Choice of Tips

Our selection of tips are available to navigate even the most difficult tracts and are available in Standard, Tiemann, Tapered and Soft Tip.

Hydrophilic or Uncoated

Our sterile catheters are supplied in a choice of hydrophilic or uncoated catheters in easy to open packaging.

Colour Coded

All our catheters and meatal dilators are colour coded for easy size recognition.

Step-by-Step Catheter Guides

Our easy to follow adult and baby guides help patients keep track of catheterisation and guide them through the procedure with ease. Visit our [download](#) and [video](#) pages at myflexicare.com.

WYCATH HYDROPHILIC INTERMITTENT CATHETERS

Our sterile Hydrophilic coated catheter comes with our Wycath water sachet sealed inside the packaging. Simply press the button to release the water before insertion. Easy to open for patients with dexterity difficulties and supplied in a range of tips.

CONTOURED, DISCREET LEG BAGS

offering a secure and comfortable fit.

Our range of leg bags are contoured to offer a comfortable fit whilst distributing urine evenly, giving patients confidence wherever they are.

Non-return Valve

All our drainage bags are fitted with a non-return valve (NRV) as standard.

Date and Use Box

Clear indications of use and a date box allow information to be recorded on all our bags.

Range of Lengths

Available in 350ml, 500ml and 750ml with a choice of tube lengths.

Needle-Free Sample Port

Our sample port eliminates the risk of needle stick injury and the smooth exterior reduces potential marking of the skin and visibility under clothing.

Secure Connection

Our stepped connectors are featured on all our leg bags offering secure and reliable connection to catheters and drainage bags.

Easy to Operate, Taps

The lever taps fitted to our leg bags are 180 degree, 2 stage action taps. Easy to operate and reducing the risk of accidental opening.

LEG BAGS

Our leg bags are available in short (7cm) or long (30cm) tube lengths and for those requiring a customised length, we offer a 500ml capacity bag with an extra-long adjustable length tube (60cm).

Standard Leg Bags

Our standard leg bag is contoured offering an improved and comfortable fit while distributing urine evenly.

DRAINABLE OVERNIGHT BAGS

robust and versatile drainage solution.

Our drainable urine bags provide a robust and versatile urine drainage solution for both hospital and community environments. All drainable 2 litre bags are fitted with a non-return valve to prevent urine reflux.

Easy to Operate, Taps

The F4 bags are fitted with a choice of a lever tap or T-tap. Both taps are simple and easy to operate.

Free and Rapid Flow

Our soft wide bore drainage tubing allows unimpaired flow of urine and comfort against the skin.

Lower Profile

The F4LS side tap lowers the profile of the drainage bag and moves the tap clear off the floor to prevent accidental contamination.

Needle-Free Sample Port

The needle-free sample port eliminates the risk of needle stick injury.

DESCRIPTION	HOSPITAL	COMMUNITY

Hospital codes are supplied in packs of 100 and community in packs of 10.

F4 PLUS 2 LITRE BAG RANGE

The F4 Plus bag is primarily used with patients who have undergone surgery. It has an integral hanger and a pasteur drip chamber to observe urine drainage.

Hydrophobic Filter

The F4 Plus hydrophobic filter prevents air building up in the bag without allowing proteins or fluids to pass through.

Integral Bag Hanger

The hanger can fit securely to any bed. The inlet tube is maintained in position to allow for direct flow into the drip chamber.

Non-Return Valve

The F4 Plus bag is fitted with a second non-return valve preventing the contents of the bag returning to the drip chamber, eliminating reflux and providing directional flow of fluids.

Drip Chamber

The pasteur drip chamber enables the urine flow to be observed.

Enclosed Tap Protector

The lever tap can be placed in the protective tap holder which keeps the outlet clear of possible contamination from the floor whilst protecting against accidental opening.

DESCRIPTION	HOSPITAL	QTY

ONCE DRAINABLE 2 LITRE BAGS

just twist-snap,
drain and dispose.

F2-EZ is a 2L drainage bag designed to be opened quickly whilst allowing controlled drainage of fluids. The bag is designed with a simple twist-snap tap to enable the urine to be directed and emptied easily.

F2-EZ Top Located Tap

The Twist-snap tap is located in the top corner of the bag to offer a 'jug' effect and greater control when emptying.

Secure Connection

Our stepped connectors are featured on the F2-EZ and F2-EZB offering secure and reliable connection to catheters and drainage bags.

Twist-Snap Tap

The innovative easy-to-open angled connector with wide bore for rapid drainage is twisted to break the seal and drain.

DESCRIPTION	HOSPITAL	COMMUNITY
F2-EZ non-sterile 2 litre once drainable bag with twist-snap tap	00-2203	00-2203C
F2-EZB non-sterile 2 litre once drainable bag with twist-snap tap	00-2208	00-2208C

Hospital codes are in packs of 100 and community in packs of 10.

F2 2 LITRE BAG RANGE

Flexicare F2 bag provides a clean and safe method of urine drainage. F2 is a high quality bag that is simple and easy to use, assuring confidence to clinicians and comfort for users.

Easy to use

The simple and easy-to-use tear mark can be used to open and drain the bag when needed. After use, the bag can be easily disposed of making the F2 an ideal bag for use in both hospital and community settings.

Safe and Secure Drainage

The non-return valve (NRV) is designed to allow low pressure drainage in one direction while preventing all flow in the opposite direction, reducing the risk of ascending infection.

Secure Connection

The stepped connector is easily inserted into your drainage system and provides a secure connection.

DESCRIPTION	HOSPITAL	COMMUNITY

simply tear the bag

drain and dispose

URIMETER

Urimeter is a sterile closed collection system with an integral measuring chamber. The vertical drainage system and incorporated non return valves (NRV's) ensure the measuring chamber empties fully once the reading has been taken to ensure accurate measurements especially with low urine output.

Enclosed Tap Protector

The lever tap can be housed in the holder when not in use to prevent the tap touching the floor or being accidentally opened.

Hydrophobic Filters

The hydrophobic filter allows for the air and any gas build up in the bag to escape without allowing proteins or fluids to pass through.

Safe and Secure Drainage

Non-return valves reduce the risk of ascending infection and allows low pressure drainage without compromising the anti-flux property.

Clear print and date box

Clear indications of use and a date box allow information to be recorded and use monitored.

Vertical Drainage

The vertical drainage ensures accurate measurements.

Soft Wide Bore Tubing

The integral hangers and straps ensure the Urimeter is securely attached to any bed frame.

URIMETER

Vented Valve System

- Maintains urine flow.
- Reduces hydrostatic pressure.
- Minimises damage to the bladder wall.
- Reduces catheter blockage.

Accuracy and Ease of Use

- Anti-kink attachment allows unimpaired flow whilst our soft tubing aids patient comfort.
- The three chamber system allows accurate readings of small volumes of urine with a smooth action 180° tap.
- The hexagonal tubing reduces surface tension allowing urine flow and increased accuracy.
- The integral hangers and detachable straps ensure the Urimeter is securely attached to any bed frame.
- The needle free sample port eliminates the risk of needle stick injury.

Accuracy and Ease of Use

- Vertical drainage ensure accurate measurements.
- Non-return valve reduces risk of ascending infection.
- Tap holder reduces potential contamination or accidental opening.

EZ-FLOW CATHETER VALVE

discreet and secure

EZ-Flow is a inconspicuous light weight neutral coloured catheter valve. The valve is designed to offer patients the flexibility of choice in managing their urinary drainage system. In line with all catheter valves, the valve remains attached to the catheter for 5 – 7 days.

Patient Comfort

The outlet sleeve of the is made of soft PVC that reduces pressure marks or discomfort for the patient.

Secure Fitting

The Ez-Flow multiple ridged connector ensures a secure fit with the catheter.

Patient Suitability

Suitable for patients with adequate bladder capacity, sensation, good dexterity and cognitive awareness.

Easy to Operate, Lever Tap

Ez-Flow has a 180°, 2 stage action tap. Easy to operate, the slightly firmer second stage reduces the risk of accidental opening on clothing or bedding.
